

Annual Science Fair

The annual Science Fair was held in the upstairs gym on Wednesday, January 25th, and was on display during W4 on the following Thursday. Participants included students enrolled in biology honors, chemistry honors, and a majority of IB science students.

Awards for 1st place, 2nd place, and 3rd place in categories biology, chemistry, and physics were given. Recipients will proceed to participate in regionals. Honorable mentions were also given out.

“Science Fair was a success this year. I walked by each project and things looked great,” Science Fair director and Biology teacher Caroline Gergel said. “The freshmen learned about the process of an experiment and working with scientific method; the upperclassmen learned more about the topics they were researching.”

“I liked Science Fair,” said freshman Elizabeth Dula, whose project won second place in the biology category along with partners Britney Tran and Mya-Ave Clyburn. “I was really surprised when I found out that we had won, because I saw a lot of great projects on display.
